

Requirements Determination · Current / To-be

BR-03 · SCN-REQUIREMENTS · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

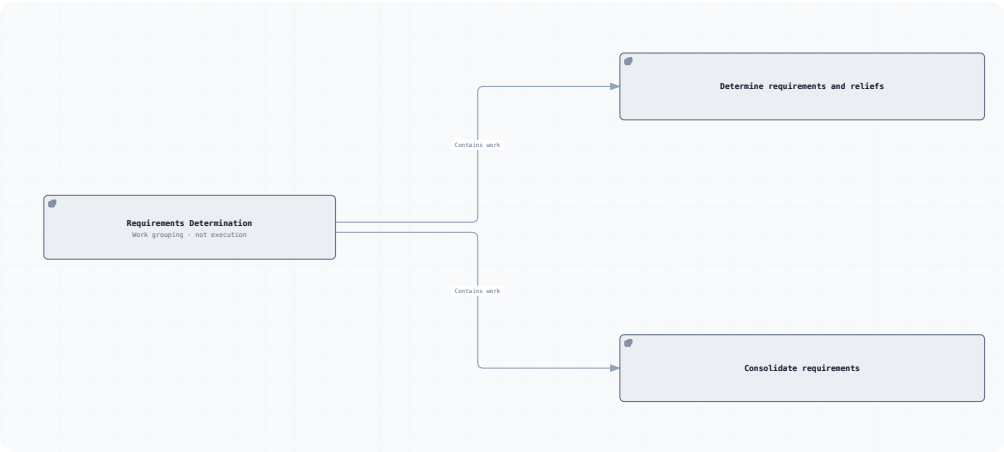

Both sides use the same case facts: Entity A and its FX forward, reported parent Entity B, and Person T is employed by Entity B; they also use the same Scope, RequirementSet, existing evidence and two residual gaps: Person T's authority to coordinate information for Entity A, and Entity A ownership/control. Employment and coordination authority do not establish signing or trading authority.

The same Scope and requirement revisions, existing evidence, permitted sources and source time, purpose assessments, two open gaps and reviewed contact details; there are no Target-only hidden files, paid connections or extra evidence.

Requirements Determination · Current / To-be

BR-03 · SCN-REQUIREMENTS · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

Determine requirements and reliefs

Determine AML/KYC requirements and applicable reliefs from context; the source does not set out the detailed decision rules.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Requirements and reliefs
requirements-and-reliefs

Controls

- Applicability judgement is retained; the source does not define its detailed rules.

Bind rule and context

Bind the policy/CIP version, subject, purpose and conditional assessment to the requirement; execute only when the rule is determinable.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Purpose-bound requirement
purpose-bound-requirement

Controls

- No rule means no apparently authoritative requirement.

Requirements Determination · Current / To-be

BR-03 · SCN-REQUIREMENTS · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

Consolidate requirements

Consolidate requirements; the source does not explain versioning, differences, or retention of distinct control origins.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Consolidated requirements
consolidated-requirements

Controls

Create applicability review

Create separate review work when the rule cannot be determined, avoiding an apparently authoritative requirement.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Applicability review work
applicability-review-work

Controls

- Unresolved applicability is reviewed rather than inferred.

Requirements Determination · Current / To-be

BR-03 · SCN-REQUIREMENTS · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

Organise a versioned requirement set

Organise requirements by subject and purpose; candidate duplicates may be grouped for display while distinct origins, controls, versions and differences remain.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Versioned requirement set
versioned-requirement-set

Controls

Requirements Determination · Current / To-be

BR-03 · SCN-REQUIREMENTS · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

1. Move from contextual requirements determination to versioned, purpose-bound rule execution or review.

MAP-D3-REQUIREMENTS-01

Current

- Determine requirements and reliefs

To-be

- Bind rule and context
- Create applicability review

MAP-D3-REQUIREMENTS-01

Move from contextual requirements determination to versioned, purpose-bound rule execution or review.

Reassigned · 1 → many

Separate execution under determinable rules from human review when applicability is unresolved, retaining the judgement boundary.

Pain / need · hypothesis

- Working hypothesis: Ops/RM may repeatedly organise requirements and remediation context; no repetition rate has been measured.

Opportunity / solution · proposal

Explain which requirement is unmet by evidence for which purpose before forming bounded tasks; retain human control over applicability, sufficiency and exceptions.

Basis / next validation

Based on D3 v0.2, exact PPT occurrences and inherited reference observations; validate with the same inputs. This is not bank policy approval or operational evidence.

Synthetic internal author review · bank validation pending

Requirements Determination · Current / To-be

BR-03 · SCN-REQUIREMENTS · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

-
- Trace requirements, evidence use and requests by subject, purpose and input revision.
 - Current and To-be must use the same accessible inputs, and proposals must not create hidden evidence or authority.
 - Observe whether coordination and signing authority remain distinct, another item stays open after one submission, and switching views never fills missing data.

Acceptance: not run · bank validation pending

Fields and unresolved source questions

- Requirement.policy_revision
- Requirement.subject_ref
- Requirement.purpose_code
- Requirement.applicability
- ApplicabilityReview.status

Source formatting is retained; it does not cancel a control or establish agent authority.

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

AUSTRAC — Initial CDD: body corporate, partnership or unincorporated association

Source observation

Consider the customer, a representative's identity and authority, beneficial owners, and the purpose of the relationship separately.

Project adaptation

Separate subject, representative, authority, purpose and evidence use.

Limits

It is not this bank's field list, material-acceptance rule, exemption or authority decision; applicable law and transition arrangements still require validation.

2. Move from general consolidation to a versioned RequirementSet organised by subject and purpose.

MAP-D3-REQUIREMENTS-03

Current

- Consolidate requirements

To-be

- Organise a versioned requirement set

MAP-D3-REQUIREMENTS-03

Move from general consolidation to a versioned RequirementSet organised by subject and purpose.

Enhanced · 1 → 1

Enhance consolidated requirements with visible origins, controls, revisions and differences without merging distinct controls.

Pain / need · hypothesis

- Working hypothesis: Ops/RM may repeatedly organise requirements and remediation context; no repetition rate has been measured.

Opportunity / solution · proposal

Explain which requirement is unmet by evidence for which purpose before forming bounded tasks; retain human control over applicability, sufficiency and exceptions.

Basis / next validation

Based on D3 v0.2, exact PPT occurrences and inherited reference observations; validate with the same inputs. This is not bank policy approval or operational evidence.

- Trace requirements, evidence use and requests by subject, purpose and input revision.

SWIFT — KYC Registry opens to corporates

Source observation

Standardised baseline information and document sharing allow the information owner to decide bank access.

Project adaptation

Separate shared baseline information from case requirements and check available material before requesting gaps.

Limits

No registry connection is confirmed for this case; shared completeness does not mean the bank accepts sufficiency or legal reliance.
