

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

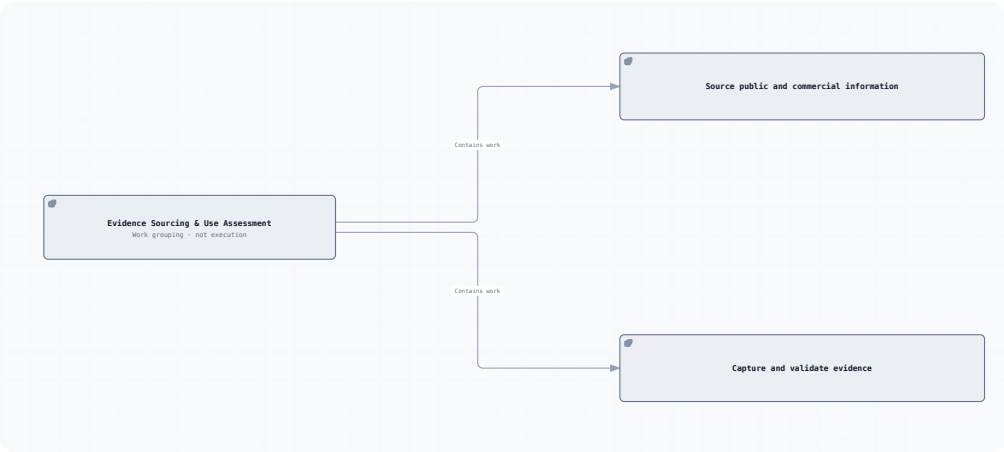

Both sides use the same case facts: Entity A and its FX forward, reported parent Entity B, and Person T is employed by Entity B; they also use the same Scope, RequirementSet, existing evidence and two residual gaps: Person T's authority to coordinate information for Entity A, and Entity A ownership/control. Employment and coordination authority do not establish signing or trading authority.

The same Scope and requirement revisions, existing evidence, permitted sources and source time, purpose assessments, two open gaps and reviewed contact details; there are no Target-only hidden files, paid connections or extra evidence.

Work structure and full work lists

Current

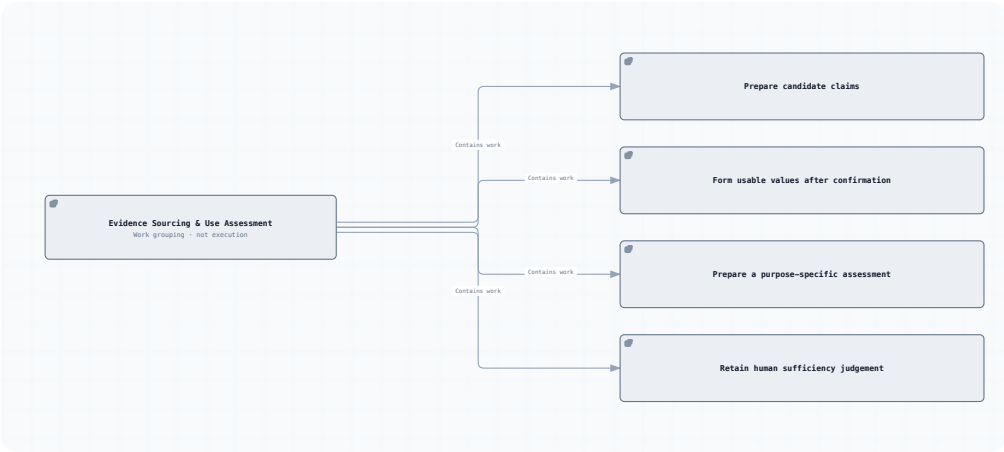

Structure overview · Archify

Work structure · contains · readable work list below

To-be

Structure overview · Archify

Work structure · contains · readable work list below

No direct predecessor is described. Current context is not a predecessor or proof that this mechanism is absent at the bank.

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

PPT-S1-SH292-A1 · PPT-S1-SH292-A4

Source public and commercial information

Obtain information from public and commercial sources; this author layer assumes no paid-source connection or access right.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Sourced information
sourced-information

Controls

- Only actually permitted and available sources may be used.

Prepare candidate claims

Prepare candidate name, relationship and other claims from permitted evidence, retaining the original locator and extraction status.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Candidate evidence claims
candidate-evidence-claims

Controls

- Extraction confidence is not identity or sufficiency.

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

Capture and validate evidence

Capture and validate whether evidence supports the relevant work; the source does not provide detailed sufficiency criteria.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Captured and validated evidence
captured-and-validated-evidence

Controls

- Complex sufficiency remains a human judgment where criteria or authority are unresolved.

Form usable values after confirmation

Only appropriately confirmed candidate claims become usable downstream values; extraction confidence is not an identity or sufficiency conclusion.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Confirmed usable values
confirmed-usable-values

Controls

- Only appropriately confirmed claims become downstream values.

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

Prepare a purpose-specific assessment

Bind each use assessment to its subject, requirement, purpose and input revision; do not treat coordination authority as evidence of signing authority.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Purpose-specific use assessment
purpose-specific-use-assessment

Controls

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

Retain human sufficiency judgement

Prepare inspectable grounds; appropriate people still handle complex sufficiency and exceptions, and any conclusion applies only to that purpose and revision.

Inputs

- Shared accessible inputs
PC01-SHARED-INPUT-01

Outputs

- Bounded sufficiency judgment
bounded-sufficiency-judgement

Controls

- Complex sufficiency and exceptions remain with an appropriately authorised person.

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

1. Propose preparation and confirmation of candidate claims without claiming that the Current process has this mechanism.

MAP-D3-SOURCE-03

Current

No direct predecessor; context only

- PPT-S1-SH292-A1
- PPT-S1-SH292-A4

To-be

- Prepare candidate claims
- Form usable values after confirmation

MAP-D3-SOURCE-03

Propose preparation and confirmation of candidate claims without claiming that the Current process has this mechanism.

Proposed addition · 0 → many

Candidate claims are a design proposal for validation; Current sources remain readable context and are not fabricated as direct predecessors.

Pain / need · hypothesis

- Working hypothesis: subject- and purpose-specific gaps may be hard to understand in one task; this has not been validated with bank users.

Opportunity / solution · proposal

Explain which requirement is unmet by evidence for which purpose before forming bounded tasks; retain human control over applicability, sufficiency and exceptions.

Synthetic internal author review · bank validation pending

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

Basis / next validation

Based on D3 v0.2, exact PPT occurrences and inherited reference observations; validate with the same inputs. This is not bank policy approval or operational evidence.

- Trace requirements, evidence use and requests by subject, purpose and input revision.
- Current and To-be must use the same accessible inputs, and proposals must not create hidden evidence or authority.
- Observe whether coordination and signing authority remain distinct, another item stays open after one submission, and switching views never fills missing data.

Acceptance: not run · bank validation pending

Evidence Sourcing & Use Assessment · Current / To-be

BR-04 · SCN-SOURCE / SCN-VALIDATE · PC01-CHECKPOINT-01 · d3a-pc01-author-r1

Numbers identify mapping groups. Contains and maps-to do not imply execution order.

HL7 FHIR R5 — Provenance

Source observation

Provenance can relate a resource revision to an activity, participants and source entities.

Project adaptation

Relate a judgement record to specific input revisions, the operator and the generating activity.

Limits

In FHIR, agent means a participant rather than AI; this project does not claim a FHIR implementation, and R4/R5 remain distinct versions.

AUSTRAC — Initial CDD: body corporate, partnership or unincorporated association

Source observation

Consider the customer, a representative's identity and authority, beneficial owners, and the purpose of the relationship separately.

Project adaptation

Separate subject, representative, authority, purpose and evidence use.

Limits

It is not this bank's field list, material-acceptance rule, exemption or authority decision; applicable law and transition arrangements still require validation.
