

Resolve a possible match

Scope revision 1 · Case revision 1 · Synthetic internal review

Prepare subject-to-record comparisons and evidence-use links. A human records the disposition or requests more information.

Wait / input: Sufficient current evidence, rationale and explicit simulated authority. Similarity is not a decision.

Human boundary: Only a configured reviewer may record the permitted unresolved outcome. Exclusion is disabled; there is no autonomous approval or automatic EDD.

Expected local result: A bounded decision records unresolved or referral against current inputs. Identity, population, EDD and other case conditions remain separately visible.

No Batch C business state has been opened; this is the authored static scene only.

WORK TRANSFORMATION · PILOT

Review one possible match for Person T using the same evidence

Open a work item to inspect the activity, proposed change and human control.

▼ Same input · authored comparison checkpoint

Checkpoint 1 uses the same possible match with insufficient evidence. Checkpoint 2 uses the same additional identity evidence after receipt and purpose review; either view may remain reasonably unresolved.

Person T and SYN-PROVIDER-RECORD-C01 use the same inputs and source time. There is no real listed person and no additional identity evidence supplied behind the scenes.

Current M4.5 sits with Operations; M4.6 and M4.7 sit with Financial Crime, Risk and Compliance. Current already includes adjudication and a risk decision.

Target M4.5 to M4.7 appear in the agentic lane, while Operations reviews ambiguity and Financial Crime adjudicates material cases. Responsibility for recording execution and judgement remains to be clarified.

This read-only comparison does not mean the live case has reached this checkpoint. Comparing never loads a fixture.

DEMO-CTT-001 · Scope revision 1 · Case revision 1

Wait and resume Return an information-gap branch to the same finding. Where authority is insufficient, refer the same review task. EDD handling cannot replace a material sanctions restriction.

Always preserved A source comparison is not verified identity. Excluding this record is not a permanent whitelist. A local disposition is not complete coverage.

01 Bind the finding to its original query Reassigned

Current

Operations handles screening hits.

Target

Fix the subject, run and provider record in the comparison context. Do not split one alias into multiple people or silently remove duplicates.

Control boundary Keep source, version and content immutable. Data preparation does not make the final risk judgement.

▼ Why this change · sources and fields D3-MATCH-01

3. Reference observations

Wolfsberg — Guidance on Sanctions Screening (2019)

An alert is not a confirmed risk. Review should use relevant information, record the disposition rationale, and make screening scope and configuration explicit.

Limits: The guidance does not directly define this project's authority, thresholds, pause scope or reuse configuration.

official_content_checked_2026-09-07 · Inherited verification; no new verification claimed

[Public source](#) ↗

4. Our design interpretation

Separate Population, Run, Finding, Review, Decision and Coverage, and organise judgement material for a person.

A design proposal for validation; not approved bank policy or proof of deployment.

Proposed field changes

- `ScreeningFinding.run_ref`
- `ScreeningFinding.subject_snapshot_ref`
- `ScreeningFinding.provider_snapshot_ref`
- `ScreeningFinding.related_record_refs`

02 Compare identifying attributes Enhanced

Current

A person reviews relevant client and match information.

Target

Create name, date-of-birth and other comparisons from current claims. Preserve multiple values, precision and unknowns, and show the source of each value.

Control boundary A missing date of birth cannot be shown as a mismatch. One different date or nationality is not an automatic exclusion rule.

▼ Why this change · sources and fields D3-MATCH-02

3. Reference observations

DFAT — Guide to Australia's Consolidated List

List records can contain several identifying attributes, aliases and incomplete information.

Limits: Do not automatically exclude on one differing attribute, assume the Australian list covers every applicable jurisdiction, or import real people.

official_content_checked_2026-09-07 · Inherited verification; no new verification claimed

4. Our design interpretation

Preserve multiple values, precision, unknowns and the original record to support a purpose-specific comparison.

A design proposal for validation; not approved bank policy or proof of deployment.

Proposed field changes

- `AttributeComparison.subject_claim_refs`
- `AttributeComparison.provider_claim_refs`
- `AttributeComparison.precision`
- `AttributeComparison.result`

03 Request specific distinguishing evidence Enhanced

Current

The Current client lane already allows screening clarification.

Target

Reuse the existing request model to create a new versioned item for distinguishing this finding. Check approved existing sources before asking externally.

Control boundary An earlier coordination grant does not automatically cover Person T's identity evidence, and the two existing request items remain intact.

3. Reference observations

ANZ — KYC SecureReply

A reference number and an OTP sent to registered contact details provide entry; save and submit are separate, and some fields have contributor-visibility limits.

Limits: This is not the whole new-institutional-client journey and does not establish the security level or representative authority for this case.

official_content_checked_2026-09-07 · Inherited verification; no new verification claimed

[Public source ↗](#)

PHKL Future Clinic — internal project handoff

The internal design keeps one case across roles while separating AI preparation, doctor sign-off, insurer review and clarification.

Limits: Internal design reference only. Production deployment and business benefit were not verified in this work, so it is not a public implementation success story.

internal_file_reviewed; not_public; no_deployment_claim · Inherited verification; no new verification claimed

4. Our design interpretation

Separate official-site entry from request lookup, and keep partial response, submission receipt and review status distinct.

Use task workspaces and separate preparation, decision and submission, linking each stage to data events and downstream roles.

A design proposal for validation; not approved bank policy or proof of deployment.

Proposed field changes

- `RequestItem.finding_ref`
- `RequestItem.purpose_code`

- `AccessGrant.resource_scope`
- `EvidenceUseAssessment.subject_ref`

04 Prepare the review pack Enhanced

Current

Operations handles the hit; the current effort needed to assemble information has not been measured.

Target

Organise cited evidence summaries, differences, unknowns and related requests. Keep AI suggestions separate from known facts.

Control boundary A language model cannot write a default pass rationale. The reviewer must inspect the supporting material.

HL7 FHIR R5 — Provenance

Provenance can relate a resource version to its activity, participants and source entities.

Limits: FHIR uses agent to mean a participant, not an AI agent. This project does not claim a FHIR implementation, and R4 and R5 remain distinct versions.

official_content_checked_2026-09-07 · Inherited verification; no new verification claimed

[Public source](#) ↗

4. Our design interpretation

Separate Population, Run, Finding, Review, Decision and Coverage, and organise judgement material for a person.

Link a judgement record to specific input versions, the operator and the generating activity.

A design proposal for validation; not approved bank policy or proof of deployment.

Proposed field changes

- `ScreeningReviewDecision.disposition`
- `ScreeningReviewDecision.input_revision_refs`
- `ScreeningReviewDecision.permission_ref`
- `ScreeningReviewDecision.rationale`

07 Separate the local result from whole-case impact Enhanced

Current

The result feeds later review of clearance prerequisites.

Target

Update only the related finding and coverage, then derive an explainable snapshot. Ownership population, EDD, Legal and Credit unknowns remain.

Control boundary Do not write `person.safe=true` or `case.cleared=true`. Later evidence changes trigger only dependency-based reassessment.

4. Our design interpretation

Link a judgement record to specific input versions, the operator and the generating activity.

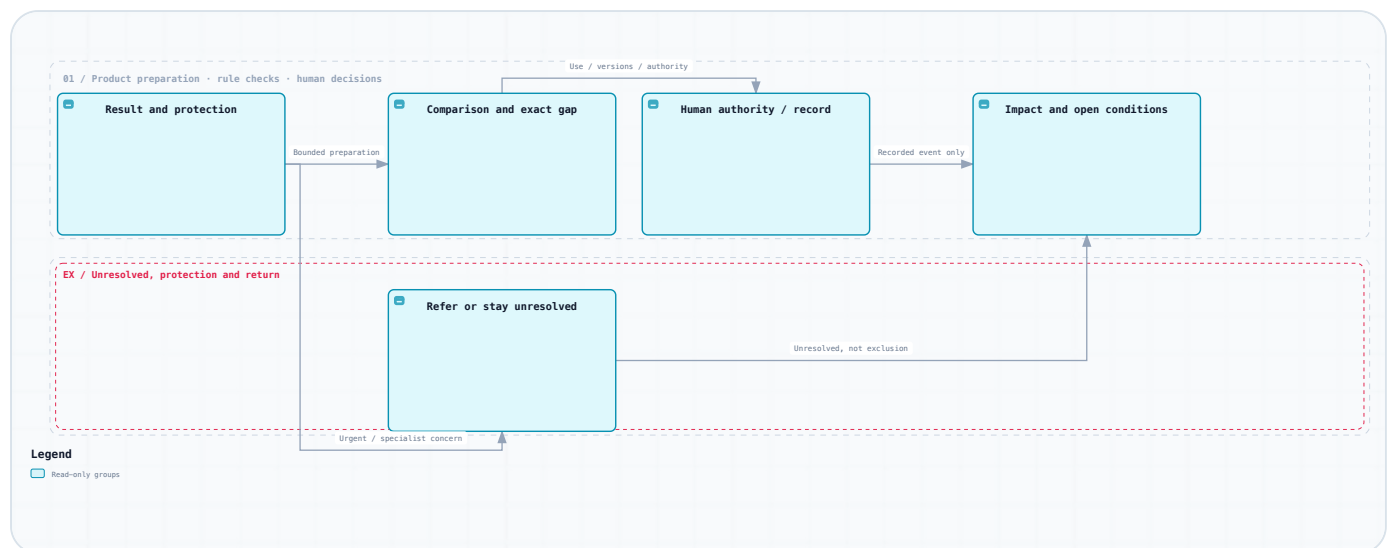

A design proposal for validation; not approved bank policy or proof of deployment.

Proposed field changes

- `ScreeningCoverageItem.finding_refs`
- `Decision.currency_status`
- `ReadinessSnapshot.blocking_refs`
- `AuditEvent.causation_ref`

Validate with users Does the work stop correctly when evidence is missing? Does selecting Target avoid automatically excluding a match when the input is unchanged?

Read-only decision detail · DG-C-MATCH · Archify 2.17

Connections explain the design; they do not execute business actions. All branches, permission and wait conditions remain below.

Receive possible match M01

Bind the finding to its run and immutable subject/provider snapshots.

Current fact: `not_evaluated`

Related action guard (not automatic node adjudication): `not_evaluated` · No current business predicate; read-only explanation

review · Our interpretation, not approved bank policy

- M01 → M02: Result belongs to the correct case and input versions.

Need immediate specialist/hold action? M02

Apply only the named demo concern/hold policy. Missing policy is not permission for unlimited work.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

referral · Our interpretation, not approved bank policy

- M02 → M10: Material concern, immediate escalation policy or specialist protection judgement.
- M02 → M03: Bounded preparation is allowed; do not delay necessary escalation.

Prepare comparison & issues M03

Prepare similar, different and inconclusive comparisons with provenance, precision and unknowns; do not auto-adjudicate.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

review · Our interpretation, not approved bank policy

- M03 → M04: Comparison and issues prepared; preparation grants no recording authority.

Evidence supports an in-scope review? M04

Assess evidence for the intended use and unresolved contradictions. Unknown is not sufficient; request only a precise permissible gap.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

identity · Our interpretation, not approved bank policy

- M04 → M05: A specific gap can be described and permissibly obtained.
- M04 → M06: Evidence supports review by the appropriate role, not a predetermined conclusion.
- M04 → M10: Sufficiency/action boundaries remain unknown, collection is inappropriate or concern is material.

Source / request specific evidence M05

Reuse Batch B request, grant, intake and assessment objects. Keep the same finding.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

request · Our interpretation, not approved bank policy

- M05 → M03: Relevant evidence arrives and intake/use prerequisites permit rebuilding comparison; otherwise wait.

Reviewer has required authority? M06

Check actor, action and case scope plus required approval policy. Unknown authority cannot record a disposition.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

review · Our interpretation, not approved bank policy

- M06 → M07: Authority explicitly permits this review/proposal.
- M06 → M10: No authority, wrong scope, unknown permission or another role required.

Human reviews and proposes action M07

An authorised human proposes a scoped outcome, further information or referral, with rationale and current inputs.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

review · Our interpretation, not approved bank policy

- M07 → M05: An authorised reviewer requests further specific evidence.
- M07 → M10: Still uncertain, material concern or referral proposed.
- M07 → M08: A scoped disposition proposal is submitted for action-time guards.

Record guards satisfied now? M08

Recheck revisions, evidence, rationale, permissions, required approvals and holds at the moment of recording.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

disposition · Our interpretation, not approved bank policy

- M08 → M09: Every required guard passes; synthetic action limited to configured scope.
- M08 → M10: Independent review/approval outstanding, insufficient authority or specialist judgement needed.
- M08 → M03: Inputs stale: keep draft, show changes and re-review.
- M08 → M07: Correctable rationale/field gap: stay in task without claiming a recorded outcome.

Record scoped disposition M09

Append a scoped decision, audit event and finding result only after guards pass. No other business authority is granted.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

disposition · Our interpretation, not approved bank policy

- M09 → M11: A successful decision-recorded event exists.

Refer / maintain unresolved M10

Record reason, next owner and held actions. An unresolved or referred finding is a valid discussion exit, not an exclusion.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

referral · Our interpretation, not approved bank policy

- M10 → M11: Unresolved/referral/hold event exists; never create an exclusion.
- M10 → M03: An authorised successor or relevant input permits same-finding resume; navigation alone does not.

Reassess linked impact M11

Reassess finding, coverage and QA/readiness dependencies. Keep unknown dependencies, original evidence and history.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

coverage · Our interpretation, not approved bank policy

- M11 → M12: Refresh linked objects and current blockers.

Return to case with remaining conditions M12

Show the scoped result and remaining population, independent EDD, Legal, Credit and QA conditions. Do not approve the whole case.

Current fact: not_evaluated

Related action guard (not automatic node adjudication): not_evaluated · No current business predicate; read-only explanation

coverage · Our interpretation, not approved bank policy

Wolfsberg Group — Guidance on Sanctions Screening

Wolfsberg Group · 2019 · Date not specified

2019; 行业 guidance

Research summary — observation and limits

Earlier research described contextual review of screening alerts. The 2019 PDF has not been reopened in this research round.

Our interpretation · not bank policy

Related work: Screen the right subjects / Resolve a possible match

SCN-POPULATION / SCN-MATCH ·

Adopt Use the bounded mechanism described above as a design reference.

Adapt Project-specific objects, permissions and tests; bank applicability remains to be validated.

Avoid Do not transfer market-specific permissions, bank policy or unverified product capabilities. Retain the source limits above.

Verification status inherited from research; see original wording · inherited_research · No new verification date

Not captured: no fabricated screenshot preview.

▼ Original research wording (Chinese; not an official translation)

前轮研究支持：筛查 alert 需结合上下文评估，不能直接当作最终风险结论。

作为 SCN-MATCH 参考；制作人需要重新打开 PDF 并核对引用位置，不预填页码或取图编号。作为 SCN-MATCH 参考；制作人需要重新打开 PDF 并核对引用位置，不预填页码或取图编号。

本 session 前轮已研究；本轮未重新打开 PDF

Wolfsberg — Sanctions Screening Guidance

Wolfsberg · Version not specified · Date not specified

Not specified in source record

Research summary — observation and limits

Screening alerts need context, relevant information and retained review rationale; guidance is not bank configuration.

Our interpretation · not bank policy

Related work: Screen the right subjects / Resolve a possible match

SCN-POPULATION / SCN-MATCH · P06 / M01 / M03 / M07

Adopt Use the bounded mechanism described above as a design reference.

Adapt Project-specific objects, permissions and tests; bank applicability remains to be validated.

Avoid Do not transfer market-specific permissions, bank policy or unverified product capabilities. Retain the source limits above.

Verification status inherited from research; see original wording · inherited_research · No new verification date

Not captured: no fabricated screenshot preview.

Project design · SRC-016:INT-C02

Human authority, evidence use and versions

Clear to Trade project · Final 1.0 · Date not specified
Approved synthetic demo design; bank applicability not established

Design judgement

Prepare, request, refer and decide are different actions. Unknown evidence or permission does not authorise a disposition.

Our interpretation · not bank policy

Related work: Resolve a possible match

SCN-MATCH · M02 / M04 / M06 / M08 / M10

Adopt Prepare, request, refer and decide are different actions. Unknown evidence or permission does not authorise a disposition.

Adapt Use existing A/B objects and action-time guards.

Avoid Do not present this design as bank-confirmed policy.

Approved demo design only · approved_design · No new verification date

Project design; no restricted internal original attached.

design_interpretation · M02 / M04 / M06 / M08 / M10

Project design · SRC-016:INT-C04

Evidence-use changes affect linked work

Clear to Trade project · Final 1.0 · Date not specified
Approved synthetic demo design; bank applicability not established

Design judgement

Retain historical inputs and decisions; re-evaluate affected current dependencies without a direct Lab write-back.

Our interpretation · not bank policy

Related work: Resolve a possible match / Know exactly what remains

SCN-MATCH / SCN-READINESS · M11

Adopt Retain historical inputs and decisions; re-evaluate affected current dependencies without a direct Lab write-back.

Adapt Use existing A/B objects and action-time guards.

Avoid Do not present this design as bank-confirmed policy.

Approved demo design only · approved_design · No new verification date

Project design; no restricted internal original attached.

design_interpretation · M11

Project source · SRC-016:S-C01

Process context: screening and parallel specialist work

Clear to Trade project source mapping · Original source version not specified; supplied filename differs from the cited (1) name ·
Date not specified
Approved synthetic workshop summary; internal original excluded

Approved-scope summary

The source process includes M1→M7, Credit C2 and Legal C1 parallel work. Batch D graph nodes are approved demo interpretations, not verbatim bank rules.

Our interpretation · not bank policy

Related work: Screen the right subjects / Resolve a possible match / Assess elevated risk, if applicable / Start conflicts early / Resolve credit conditions / Complete applicable agreements

Project source · SRC-016:S-C03

Approved Batch B collaboration boundary

Clear to Trade project source mapping · Approved Addendum 1.0 · Date not specified

Approved synthetic workshop summary; internal original excluded

Approved-scope summary

Identity collection reuses the existing request, recipient, grant, submission and evidence-use contracts. Existing coordination and ownership items must retain their own states.

Our interpretation · not bank policy

Related work: Screen the right subjects / Resolve a possible match / Assess elevated risk, if applicable

SCN-POPULATION / SCN-MATCH / SCN-EDD · P12 / M05 / E12

Adopt Use the bounded mechanism described above as a design reference.

Adapt Apply only to the approved local synthetic scope and preserve source status.

Avoid Do not transfer market-specific permissions, bank policy or unverified product capabilities. Retain the source limits above.

Source read; approved demo contract, not bank policy verification. · approved_final_summary_only · No new verification date

Project design; no restricted internal original attached.

approved_project_summary_not_original · P12 / M05 / E12

Project source · SRC-016:S-C06

P0/P1 boundary — original source unavailable

Clear to Trade project source mapping · Original P0/P1 version unavailable · Date not specified

Approved synthetic workshop summary; internal original excluded

Approved-scope summary

The Final restatement requires full return paths and honest readiness: completing a visible task does not close unrelated or unknown conditions. The missing original remains a source question.

Our interpretation · not bank policy

Related work: Resolve a possible match / Assess elevated risk, if applicable

SCN-MATCH / SCN-EDD · M12 / E04 / E11

Adopt Use the bounded mechanism described above as a design reference.

Adapt Apply only to the approved local synthetic scope and preserve source status.

Avoid Do not transfer market-specific permissions, bank policy or unverified product capabilities. Retain the source limits above.

Original P0/P1 document not found; only the approved Final restatement is available. No independent source verification. ·
approved_final_summary_only · No new verification date

Project design; no restricted internal original attached.
